

## 95538

Dahle magnets will cling to any surface with a reasonable ferrous content. Their easy-grip caps make them simple to position and quick to remove. Clean-cut design, bright colours in many shapes and sizes make them ideally suited to a wide range of applications - as either fixing or planning elements.

The magnetic surface is provided with a plastic hood and thus protects the working surface from staining.

### Colours:

Contents:	10 pieces
Holding power:	25 N
Height:	13,5 mm
Size:	38 mm Ø
